WAREHOUSE MANAGEMENT IN OIL AND GAS INDUSTRY

One of the vital operations in an oil and gas industry in providing customer support and a reduced cost to the company, is the Warehousing facility. Yet this operation is the least talked about. Effective warehouse management, by applying the skills for the same is required for the smooth functioning of the company.

Effective warehouse management, by applying the skills for the same is required for the smooth functioning of the company.

OUR WAREHOUSE MANAGEMENT TRAINING COURSE ENSURES THAT THE PARTICIPANTS ARE TRAINED ON THE FOLLOWING LINES:

- Evaluating processes and providing effective methods to eliminate unnecessary steps that add up to the extra costs.
- Equips the student with practical/real life skills to handle various workplace situations and contingencies to avoid back log of processes.
- Participants will be trained to deliver high quality customer service to ensure better client relations and feedback. Along with this, co-ordination with the various parts of the organization, ensures a better return on investment. Our training course will highlight:
- The best practices that are being followed in an oil and gas industry and how to build new practices to suit different company processes and policies.
- Building a strong rapport with supplier/contractors to ensure higher standards of efficiency in performance. Train the warehouse personnel with all the required skills and make them aware of the impact of mismanagement that leads to financial bottlenecks to the management.
- Proper training to handle materials and reduce the overall cost on materials and services.

BY THE END OF THE PROGRAM, PARTICIPANTS WILL LEARN TO:

- Identify and build best practices for warehouse professionals
- Think in broader terms that engulfs value addition to customers and stakeholders
- Work effectively in terms of a comprehensive planning of warehouse and the organisational plans.
- Compare and asses traditional and modern warehousing techniques.
- Give more importance to customer relations along with production and marketing.
