

LOGISTICS DISTRIBUTION & TRANSPORTATION MANAGEMENT

CHOOOLS CONSULTING SERVICES PVT LTD

GLOBAL LOGISTIC CHALLENGES ACROSS THE DIFFERENT OIL & GAS ACTIVITIES

- Logistics and transportation have always been a challenging area for Oil and Gas companies, irrespective of whether they operate in upstream, midstream or downstream sector.
- As the O & G sector is subject to high standards of HSE (Health, Safety and Environment) constraints, it becomes more difficult to handle the planning and managing of activities.
- The data culture and access to logistics and focus on a constructive end-to-end logistics is limited in O & G sector as the skills required in this field is mostly technical in nature.
- There are certain strategic steps that an organization could implement in order to tackle the bottlenecks thus created and improve the logistics performance.

The Certified in Logistics, Transportation and Distribution (CLTD) certification provides you with the information you need to meet today's supply chain logistics challenges. Created with a team of subject matter experts, the CLTD designation covers a comprehensive body of knowledge that sets the global standard for best practices in logistics, transportation and distribution.

OPPORTUNITIES

A CLTD designation helps you to stand out of the crowd and increases your professional value.

TRANSFORMATION

Innovate and bring positive changes to your organization thereby transforming it to global standards

STAY UPDATED

Be up to date with the leading logistics trends and advancements in the industry globally.

RECOGNITION

Being recognised as a logistics expert improves your confidence.

OPTIMIZATION

Helps you to reduce the cost and increase the profitability of your organization by the optimised use of its resource.

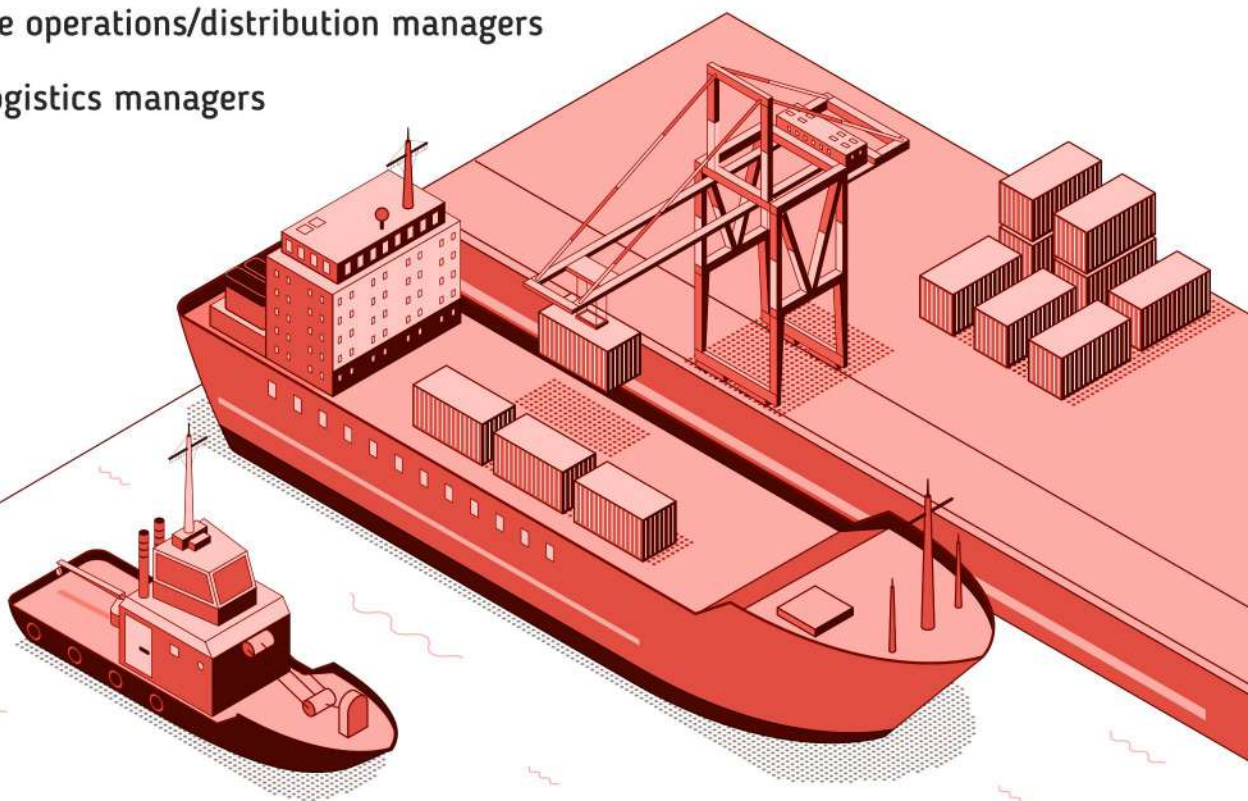

THE CLTD PROGRAM BROADLY OUTLINES THE FOLLOWING:

- Logistics Overview and Strategy
- Capacity Planning and Demand Management
- Order Management
- Inventory Management
