

## DATA ANALYTICS ASSIGNMENT QUESTIONS

### DAY - 13:

**1. Explain the process of creating a chart using the Chart Wizard in spreadsheet applications. Discuss the key steps involved and highlight the benefits of using the Chart Wizard for creating visual representations of data.**

**2. Discuss the importance of modifying charts for effective data representation. Provide examples of modifications that can be made to enhance the visual appeal and clarity of a chart. How do these modifications contribute to better communication of data insights?**

**3. Explain the process of changing the chart type in a spreadsheet application. Provide a scenario where changing the chart type is beneficial, and discuss how this modification can impact the representation of data.**

**4. What is the primary purpose of changing the chart type in a spreadsheet application?**

- a) To update the data range used in the chart
- b) To modify the appearance of individual data points
- c) To emphasize different aspects of the data representation
- d) To move the entire chart to a different location on the worksheet
