

## DATA ANALYTICS ASSIGNMENT QUESTIONS

### DAY - 14:

**1. Explain the significance of changing the way data is displayed in a chart. Provide examples of scenarios where adjusting the display settings can enhance the visual representation of data, and discuss the impact on data interpretation.**

**2. Discuss the process of moving the legend in a chart and explain the considerations for choosing an appropriate position. Provide an example scenario where relocating the legend is beneficial for improving the chart's visual appeal and readability.**

**3. Explain the importance of formatting charts and adding chart items for effective data communication. Provide examples of formatting options and additional items that can be incorporated into a chart, and discuss how these elements contribute to conveying insights.**

**4. What is the primary purpose of adding chart items, such as data labels and annotations, to a chart?**

- a) To change the color scheme for visual appeal
- b) To provide additional context and information
- c) To relocate the legend for better organization
- d) To adjust the font style for improved readability
