Cod	otion 1. Cofety first impression.	4 Caana		
	<u> </u>	Score		
1.				
<u> </u>	Check the PPEs provided by the facility at entrance  Appropriate site information and safety rules are provided to visitors			
2.	Check the visitor's tag provided at entrance			
3.	Smoking is strictly prohibited except in the specified areas			
٦.	Check visually, and check the designated smoking areas			
4.	The use of mobile phones is strictly prohibited on the shop floor			
٦.	Visual check			
5.	Work areas are generally safe and free from hazards and other obstructions			
٥.	Visual check walkways, exit routs, etc.			
6.	Safety rules are being enforced visually throughout the whole facility			
-	Check for visual safety rules on walls, boards, etc.			
7.	Employees are using PPEs correctly and at all time			
	Check visually hearing protection and safety footwear			
8.	PPEs are being used as per the requirement			
	Check visually where necessary the use of helmets, face shields, goggles, safety glasses,			
	masks and respirators, safety gloves, safety harnesses)			
Comments:

Section 2 – Fire and emergency:				
9.	The general condition of fire extinguishers is satisfactory			
	Check cleanliness, labeling, visibility, safety seal			
10.	. Fire extinguishers are tagged with the last date of inspection			
	No more than 12 months - check 2 in 2 different work areas			
11.	. The firefighting equipment cabinet is in good condition			
	Visual check of the general condition			
12.	. The firefighting equipment cabinet has a checklist of its content			
	Check the checklist			
13.	. The fire protection system is tested periodically			
	Any evidence of the test for the detection, alarm, sprinkler, pump and hose subsystems			
14.	. Emergency drills are conducted on a regular basis and for all shifts			
	Check records and schedule			
15.	Evacuation procedures and routs are posted at appropriate places			

	Any evidence from 2 work areas	
16.	Emergency lighting is in good condition	
	Check emergency lighting in 2 different work areas	
17.	Exit doors are operating properly	
	Check 2 exit doors if locked	
18.	Emergency services numbers are posted at appropriate places	
	Check emergency service numbers at entrance & workshop	
19.	At least one member in every work area is trained on fire fighting	
	Check training records from 2 different work areas	
Cor	mments:	
_		
<u>Sec</u>	ction 3 – First Aid and Accident Reporting:	
20.	First aid stations are in good condition	
	Visual check of the general condition	
21.	First aid stations are accessible during all work shifts	
	Check the accessibility of 2 first aid stations	
22.	First aid stations are regularly inspected for content	
	Check the inspection records	
23.	Items in first aid stations are within use-by dates	
2.4	Check the dates of items in 2 different first aid stations	
24.	Items in each first aid station are of sufficient quantities	
	Check the quantities for bandages, blankets, antiseptic wipes, adhesive tapes, gauze rolls,	
25	gauze pads, instant cold packs, scissors, tweezers, first aid manual  Items in each first aid station are adequately stocked	
25.	Visual check the general organization of items	
26	At least one first aider is present at all times during working hours for every 50 workers	
20.	Check training records from 2 different work areas	
27	Specific procedures are in place in the event of accidents, incidents and near misses	
_,.	Any evidence from 2 work areas	
28.	Accident and serious incident investigations are conducted to determine causes and avoid	
	recurrence	
	Check an example of investigation report	
29.	Investigation results of accidents and serious incidents are communicated to all teams	
	Visual check, minutes, emails,	
COI	mments:	

### Section 4 - Safety Systems:

30.	Safety measures are in place (e.g. recordable cases, near miss cases, lost work days)	
	Check performance reports and reporting time and date	
31.	A workplace inspection system is in place to report unsafe conditions	
	Any evidence for unsafe conditions recorded	
32.	A safety observation and communication system is in place to report unsafe acts  Any evidence for unsafe acts recorded	
22	Hazard identification and risk assessments are performed reactively and proactively	
55.	Check the risk registry - focus on highly unsafe areas	
34.	Safety training programs are included in the master training plan	
	Check master training plan	
35.	Safety training programs are conducted as planned	
	Check training reports	
36.	Safety training programs are delivered by qualified personnel	
	Check trainers profiles	
37.	Skills matrices are utilized to manage and track safety skills of all work teams	
	Check the skills matrices	
38.	The EHS representative is authorized to instruct the workers to follow safety rules	
	Check job description for EHS representative	
Co	mments:	
	······	
	ction 5 – Chemical:	
	A master list of all chemicals, solvents and lubricants is in place	
39.	A master list of all chemicals, solvents and lubricants is in place  Check the master list	
39.	A master list of all chemicals, solvents and lubricants is in place  Check the master list  Material Safety Data Sheets (MSDS) are available where materials are being used	
39. 40.	A master list of all chemicals, solvents and lubricants is in place  Check the master list  Material Safety Data Sheets (MSDS) are available where materials are being used  Check the availability in 2 places	
39. 40.	A master list of all chemicals, solvents and lubricants is in place  Check the master list  Material Safety Data Sheets (MSDS) are available where materials are being used  Check the availability in 2 places  Material Safety Data Sheets (MSDS) are up to date	
39. 40. 41.	A master list of all chemicals, solvents and lubricants is in place  Check the master list  Material Safety Data Sheets (MSDS) are available where materials are being used  Check the availability in 2 places  Material Safety Data Sheets (MSDS) are up to date  Check if the MSDS are up to date	
39. 40. 41.	A master list of all chemicals, solvents and lubricants is in place  Check the master list  Material Safety Data Sheets (MSDS) are available where materials are being used  Check the availability in 2 places  Material Safety Data Sheets (MSDS) are up to date  Check if the MSDS are up to date  Appropriate safety containers are being used for chemical and solvent handling	
<ul><li>39.</li><li>40.</li><li>41.</li><li>42.</li></ul>	A master list of all chemicals, solvents and lubricants is in place  Check the master list  Material Safety Data Sheets (MSDS) are available where materials are being used  Check the availability in 2 places  Material Safety Data Sheets (MSDS) are up to date  Check if the MSDS are up to date  Appropriate safety containers are being used for chemical and solvent handling  Visual check containers in 2 different areas	
<ul><li>39.</li><li>40.</li><li>41.</li><li>42.</li></ul>	A master list of all chemicals, solvents and lubricants is in place  Check the master list  Material Safety Data Sheets (MSDS) are available where materials are being used  Check the availability in 2 places  Material Safety Data Sheets (MSDS) are up to date  Check if the MSDS are up to date  Appropriate safety containers are being used for chemical and solvent handling  Visual check containers in 2 different areas  All containers are clearly labeled with the appropriate content (including trial materials)	
<ul><li>39.</li><li>40.</li><li>41.</li><li>42.</li><li>43.</li></ul>	A master list of all chemicals, solvents and lubricants is in place  Check the master list  Material Safety Data Sheets (MSDS) are available where materials are being used  Check the availability in 2 places  Material Safety Data Sheets (MSDS) are up to date  Check if the MSDS are up to date  Appropriate safety containers are being used for chemical and solvent handling  Visual check containers in 2 different areas  All containers are clearly labeled with the appropriate content (including trial materials)  Visual check labels on containers in 2 different areas	
<ul><li>39.</li><li>40.</li><li>41.</li><li>42.</li><li>43.</li></ul>	A master list of all chemicals, solvents and lubricants is in place Check the master list  Material Safety Data Sheets (MSDS) are available where materials are being used Check the availability in 2 places  Material Safety Data Sheets (MSDS) are up to date Check if the MSDS are up to date Appropriate safety containers are being used for chemical and solvent handling Visual check containers in 2 different areas  All containers are clearly labeled with the appropriate content (including trial materials) Visual check labels on containers in 2 different areas  Man showers and eye baths are in place in chemical and solvent areas	
<ul><li>39.</li><li>40.</li><li>41.</li><li>42.</li><li>43.</li><li>44.</li></ul>	A master list of all chemicals, solvents and lubricants is in place  Check the master list  Material Safety Data Sheets (MSDS) are available where materials are being used  Check the availability in 2 places  Material Safety Data Sheets (MSDS) are up to date  Check if the MSDS are up to date  Appropriate safety containers are being used for chemical and solvent handling  Visual check containers in 2 different areas  All containers are clearly labeled with the appropriate content (including trial materials)  Visual check labels on containers in 2 different areas  Man showers and eye baths are in place in chemical and solvent areas  Visual check in chemicals and solvent areas

<ul><li>39.</li><li>40.</li><li>41.</li><li>42.</li><li>43.</li><li>44.</li><li>45.</li></ul>	A master list of all chemicals, solvents and lubricants is in place  Check the master list  Material Safety Data Sheets (MSDS) are available where materials are being used  Check the availability in 2 places  Material Safety Data Sheets (MSDS) are up to date  Check if the MSDS are up to date  Appropriate safety containers are being used for chemical and solvent handling  Visual check containers in 2 different areas  All containers are clearly labeled with the appropriate content (including trial materials)  Visual check labels on containers in 2 different areas  Man showers and eye baths are in place in chemical and solvent areas  Visual check in chemicals and solvent areas  The emergency spill kit content are clearly identified and of sufficient quantities  Check the content  The emergency spill kit content are regularly checked	
39. 40. 41. 42. 43. 44. 45.	A master list of all chemicals, solvents and lubricants is in place Check the master list  Material Safety Data Sheets (MSDS) are available where materials are being used Check the availability in 2 places  Material Safety Data Sheets (MSDS) are up to date Check if the MSDS are up to date  Appropriate safety containers are being used for chemical and solvent handling Visual check containers in 2 different areas  All containers are clearly labeled with the appropriate content (including trial materials) Visual check labels on containers in 2 different areas  Man showers and eye baths are in place in chemical and solvent areas Visual check in chemicals and solvent areas  The emergency spill kit content are clearly identified and of sufficient quantities Check the content  The emergency spill kit content are regularly checked Check the inspection records	
39. 40. 41. 42. 43. 44. 45.	A master list of all chemicals, solvents and lubricants is in place Check the master list  Material Safety Data Sheets (MSDS) are available where materials are being used Check the availability in 2 places  Material Safety Data Sheets (MSDS) are up to date Check if the MSDS are up to date  Appropriate safety containers are being used for chemical and solvent handling Visual check containers in 2 different areas  All containers are clearly labeled with the appropriate content (including trial materials) Visual check labels on containers in 2 different areas  Man showers and eye baths are in place in chemical and solvent areas Visual check in chemicals and solvent areas  The emergency spill kit content are clearly identified and of sufficient quantities Check the content  The emergency spill kit content are regularly checked Check the inspection records  Combustible materials are stored away from electrical equipment and ignition sources	
39. 40. 41. 42. 43. 44. 45.	A master list of all chemicals, solvents and lubricants is in place Check the master list  Material Safety Data Sheets (MSDS) are available where materials are being used Check the availability in 2 places  Material Safety Data Sheets (MSDS) are up to date Check if the MSDS are up to date  Appropriate safety containers are being used for chemical and solvent handling Visual check containers in 2 different areas  All containers are clearly labeled with the appropriate content (including trial materials) Visual check labels on containers in 2 different areas  Man showers and eye baths are in place in chemical and solvent areas Visual check in chemicals and solvent areas  The emergency spill kit content are clearly identified and of sufficient quantities Check the content  The emergency spill kit content are regularly checked Check the inspection records	

## Section 6 - Electro-mechanical: 48. Every electrical device is switched-off if not in use Visual check 49. All electrical cabinets are locked when not being worked on Visual check in 2 different areas 50. Using improper or unauthorized electrical appliances is prohibited in the facility Check the corresponding directive or rule 51. Electrical plugs and wires are in good conditions Visual check in 2 different areas 52. Electrical plugs and wires are inspected for possible damage regularly Check the inspection records 53. Power sources are disconnected before servicing any machinery that is in motion Visual check - servicing includes repairing, lubricating or cleaning 54. Equipment guards are in place Visual check 55. Equipment guards must prevent all access to moving parts Visual check 56. Equipment guards are secured by a method requiring a tool to remove it Visual check 57. The facility uses an effective LOTO system during service or maintenance activities Any evidence from any work areas **Comments:** Section 7 – Environmental: 58. Waste is segregated or recycled where possible Is there a waste segregation procedure/bins in place? 59. Waste containers are kept closed and secured except when waste is added or removed Check the corresponding policy or rule 60. Efforts are being made to reduce wastage (a waste management plan is in place) Check the plan 61. Efforts are being made to reduce energy Check the plan 62. Efforts are being made to reduce water consumption Check the plan 63. Air emission controls are in place

**Safety Maturity Assessment Checklist** 

Check the records

64.	Water effluent controls are in place Check the records			
65.	Air quality inside the facility is measured and monitored regularly  Check the records			
66.	Noise level is measured and monitored regularly  Check the records			
Comments:				
	ction 8 – More Standards:			
67.	Ladders are in good condition and used properly  Visual check			
68.	Ladders are inspected regularly Check the inspection records			
69.	Ladders are secured (via a locked chain)  Visual check			
70.	Ladders are only used by authorized and trained personnel  See the list of authorized personnel			
71.	Permit to work is applied for all work at height			
	Any evidence of the work permits			
/2.	Permit to work is applied for all work within confined spaces  Any evidence of the work permits			
73.	Safety alerts and route signs are in place when working on fragile roofs  Visual check			
74.	Safety walkways for pedestrians are identified  Visual check			
75.	Handrails are in place at slippery floors or at heights  Visual check			
76.	Signage, hazard warnings and safety instructions are in place at the point of need Visual check			
77.	Visual management maps are used to monitored the areas of highly unsafe cases & high risks  Any evidence of the visual management maps			
78.	Cranes and forklifts are only operated by authorized and licensed drivers  See the list of authorized personnel
